

AAA INTERGALACTIC's Fair Funding System

AAA Intergalactic Investments Group is Facilitating Funding of Sustainable Businesses Worldwide

AAA Intergalactic Investments Group (AAA Intergalactic), an investment group with headquarters in the US, in Germany, and Cameroon founded by the young and dynamic European-African Princess by birth, is all set to fund futuristic and social projects in promising markets.

CEO and founder Princess Rachel Belle said the group's "primary mission is to promote a fair funding system, thereby enabling industrialisation and a better socio-economic future for the youth".

Mission

The young Chairwoman summed up the attitude of the AAA Intergalactic Investments Group in a recent interview:

"We give a fair chance to those left behind, to those who scream without a voice, to those talented ones without fair opportunities."

Author – HRH Princess Rachel Belle

Princess Belle founded this Investment Group to disrupt the known bottlenecks along the flow of global investments.

In a world where hunger still exists, and injustices are multiplying, the desire to succeed socially and economically is more than ever synonymous with the creation of a better world.

AAA Intergalactic has dedicated itself to this task for a brighter common future for all. *It is a unique investor with a mission to promote a fair system of financing which, in turn, will accelerate industrialisation in several marginalised communities worldwide.* As a result, thousands of jobs will be created through microfinance, private equity, mergers and acquisitions, project financing and innovative investments around the world.

IN PLAIN WORDS, AAA INTERGALACTIC STRIVES TO EXECUTE TWO ACTION PLANS:

- 1 Invest in hard-working communities that need it the most.
- 2 Create, by investment, a fair system that fosters businesses and creates jobs

This process will focus mainly on Africa and other continents, where a financial injection, tailored to the needs of promising companies, will energise developing communities and create jobs. The eradication of poverty and an improved socio-economic future for young people would be a direct result of this system.

This result will be achievable through selecting the most promising entrepreneurs in each community and supporting them through the unique financial platforms of the AAA Intergalactic Investments Group. Starting this year, its "Fair Funding movement" has been designed to offer candidates a diversified capital base adapted to the needs of local entrepreneurs.

Focusing Today on the Future

Princess Rachel Belle and heavyweight champion Dr Wladimir Klitschko

Releasing hard-to-access capital and putting in place an appropriate mentorship program is what motivates the founder, Princess Belle, a successful financial pioneer. In the shadows and silently, she carefully studied all aspects of her trade.

If world heavyweight champion Dr Wladimir Klitschko nicknamed "Dr Steelhammer", can win championships, Princess Belle is similarly trained in her field and enters the ring with her group to knock out the massive unemployment.

Today she is using her hard-won strategic system to catapult her young group onto the world stage and into world markets. She said: "We have been working behind the scenes for a long time. Now is the time to go public." That is precisely what she is doing. Princess Rachel Belle keeps her promises. In 10 months, the AAA Intergalactic Investments Group, led by CEO Princess Belle has strategically formed several companies: AAA Intergalactic Investments located on Wall Street in New York, as an American base; AAAIntergalactic HochschildCapital has its European Headquarters situated in Frankfurt, Nextower/ Thurn-und-Taxis-Platz; and AAA Intergalactic Infrastructure has its headquarters in Africa and for the Middle East located in Ancien Dalip, Douala, Cameroon.

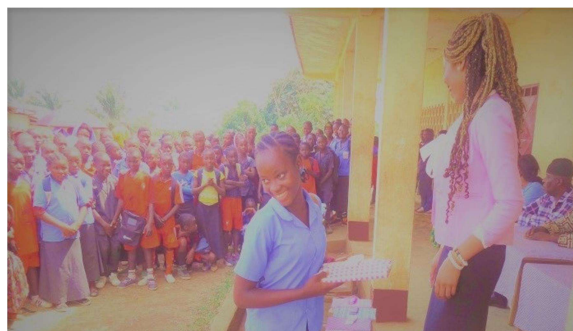

"Practice what you preach" is the philosophy of CEO, Princess Belle. To prove this, she and her teams are working to identify, qualify and multiply business opportunities through B2B capitalisation by engaging with leading specialists, who share her vision and see the wisdom of investing in the future of developing communities.

Investments Combined with Philanthropy

"The time has come to move in the right direction with quick and effective action" said AAA Intergalactic's CEO, adding:

"Poverty is the only illness that cannot be diagnosed by doctors but that financial institutions can and should treat."

Author – HRH Princess Rachel Belle

AAA Intergalactic's CEO, Princess Belle distributing scholarships

AAA Intergalactic's CEO donated school supplies and gifts to students.

Princess Belle donated school supplies to the Lycée's management, and gifts to the best teachers.

AAA Intergalactic's CEO Princess Belle distributing cash gifts to the best professors In Africa

Students were thrilled and spontaneously sang to thank Princess Belle.

The AAA Intergalactic scholarships are therefore not just a philanthropic so-called "nice gesture"; these are necessary investments to help students, especially women, and the communities in general, stave off poverty.

AAA Intergalactic's Fair Funding System – The Movement

Why join such a promising financial group that will help to achieve a brighter future for many?

AAA Intergalactic is the first independent financial group dedicated to presenting a financially fair, futuristic and diversified investment platform. It supports the construction of a viable socio-economic future for marginalised communities and especially their youth. Its difference to other companies in its field lies in its sincere motivation: to offer socially responsible investment opportunities to those who are not only most disadvantaged but who also show the most significant potential to succeed. Thereby the group will foster sustainable values, create meaningful jobs and grow wealth for millions of worthy households.

AAA Intergalactic offers urgent financial investment and critical business leadership skills, but its main goal is to eradicate extreme poverty, encourage industrialisation, nurture excellence and foster entrepreneurship in developing communities.

It is often said that the grass is always greener elsewhere; however, this impression originates in the human tendency to compare himself/ herself to others without truly understanding or taking action. AAA Intergalactic's unique strengths lie in its insightful prognosis and in-depth analysis into communities. This analysis often reveals hidden trends, which focuses the group's attention on promising entrepreneurs who will be chosen to succeed in the markets of tomorrow. The group differentiates itself from other financial institutions in that it leads by example. This helps to strengthen the character of its clients and creates future leaders by inspiring them to achieve success.

AAA Intergalactic is flexible, fast and efficient with maximum cost reduction in processing funding requests in 3 to 6 weeks, instead of the usual 3 to 9 months.

AAA Intergalactic is the leading independent, futuristic, financial services provider in its targeted communities.

In pointing out what makes the group competitive, AAA Intergalactic's Chairwoman said:

"Accurate analysis and prognoses help us identify future trends and select the best with the highest potential. We bring profound cultural and political understanding. Our decision-making process is efficient and at least 10 times faster than other processes."

Through its unique investment boutique approach, the group executes highly effective due diligence as well as cultivates trustworthy relationships with its clients, co-investors, and stakeholders. Its transparent culture and well implementable projects give 100% confidence to its financial partners, many of whom are invited to participate in the efficient evaluation process of the AAA Intergalactic Investments Group.

The Group does not only confine itself to conventional project funding and infrastructural investments. **The AAA Intergalactic "Fair Funding system" is unique**; AAA Intergalactic focuses on bringing dynamic futuristic investments into several vertical markets in regions where poverty, lack of opportunity and inequality still prevail. Its major focus areas are:

- ➔ Futuristic Logistics
- ➔ Smart Cities
- ➔ Renewable energy
- ➔ Innovative and healthy agriculture methods
- ➔ Futuristic infrastructure
- ➔ Artificial Intelligence
- ➔ Micro-financing
- ➔ Private equities
- ➔ Project financing

AAA Intergalactic also brings full investment services:

- Deal Origination and Transactions
- Efficient Due Diligence and Risk Management
- Market entry strategy and General Management
- Active Local Project Funding

Equally Relevant

“I am a member of the German UN Women Committee,

because as laid down in the Basic Law, the dignity of the human being and the equality of women are not negotiable for me. As a member, I can actively campaign for more equality in my business area and against discrimination.”

HRH Princess Rachel Belle

Passion – Commitment – Integrity; these are the three currencies of the AAA Intergalactic Investments Group, which will ensure fairness and justice in the futuristic markets of developing communities. That's its niche – to caringly capitalise those most in need of its Fair Funding. The very committed CEO is also one of the female members of the German National Committee of the UN.

Women are not at the top of the financial pyramid when evaluated by credit institutions. However, AAA Intergalactic seeks to change this reality for female entrepreneurs and employees. Women are the most effective, creative and innovative workers in households and businesses. Unfortunately, women have historically been forced to achieve a great deal with very few resources. It is often said that women are reluctant to take risks, while men are attracted to risky behaviour. That is why we believe that women are the most eligible candidates for advanced funding on fair and affordable terms. AAA Intergalactic gives women and men a chance to achieve their full potential and gives deprived communities a fair chance to rise. Their win is AAA Intergalactic Investments Group's victory.

AAA Intergalactic is currently evaluating several impactful projects with the support of PwC. AAA Intergalactic and partners are working on the implementation of innovative agri-businesses and logistics that will create 1030 sustainable jobs in the next 3 years.
